

Healthy Cookware from birth

We protect your health with
soul and heart

Leader in titanium products

Summary

Titanium 3

- Healthy
- Durable
- User-friendly

Black Series 6

- Features
- Saute pan
TDCG004
- Frying pan
TDJG002

Exquisite Series 9

- Features
- Soup pot
TDTG002
- Saucepan
TDNG002

Leader of healthy titanium products

TITANIUM

Cookware

Healthy

Our titanium cookware is very different from regular Teflon.

While Teflon tends to get scratched when exposed to high temperatures and can cause serious damage to the liver,

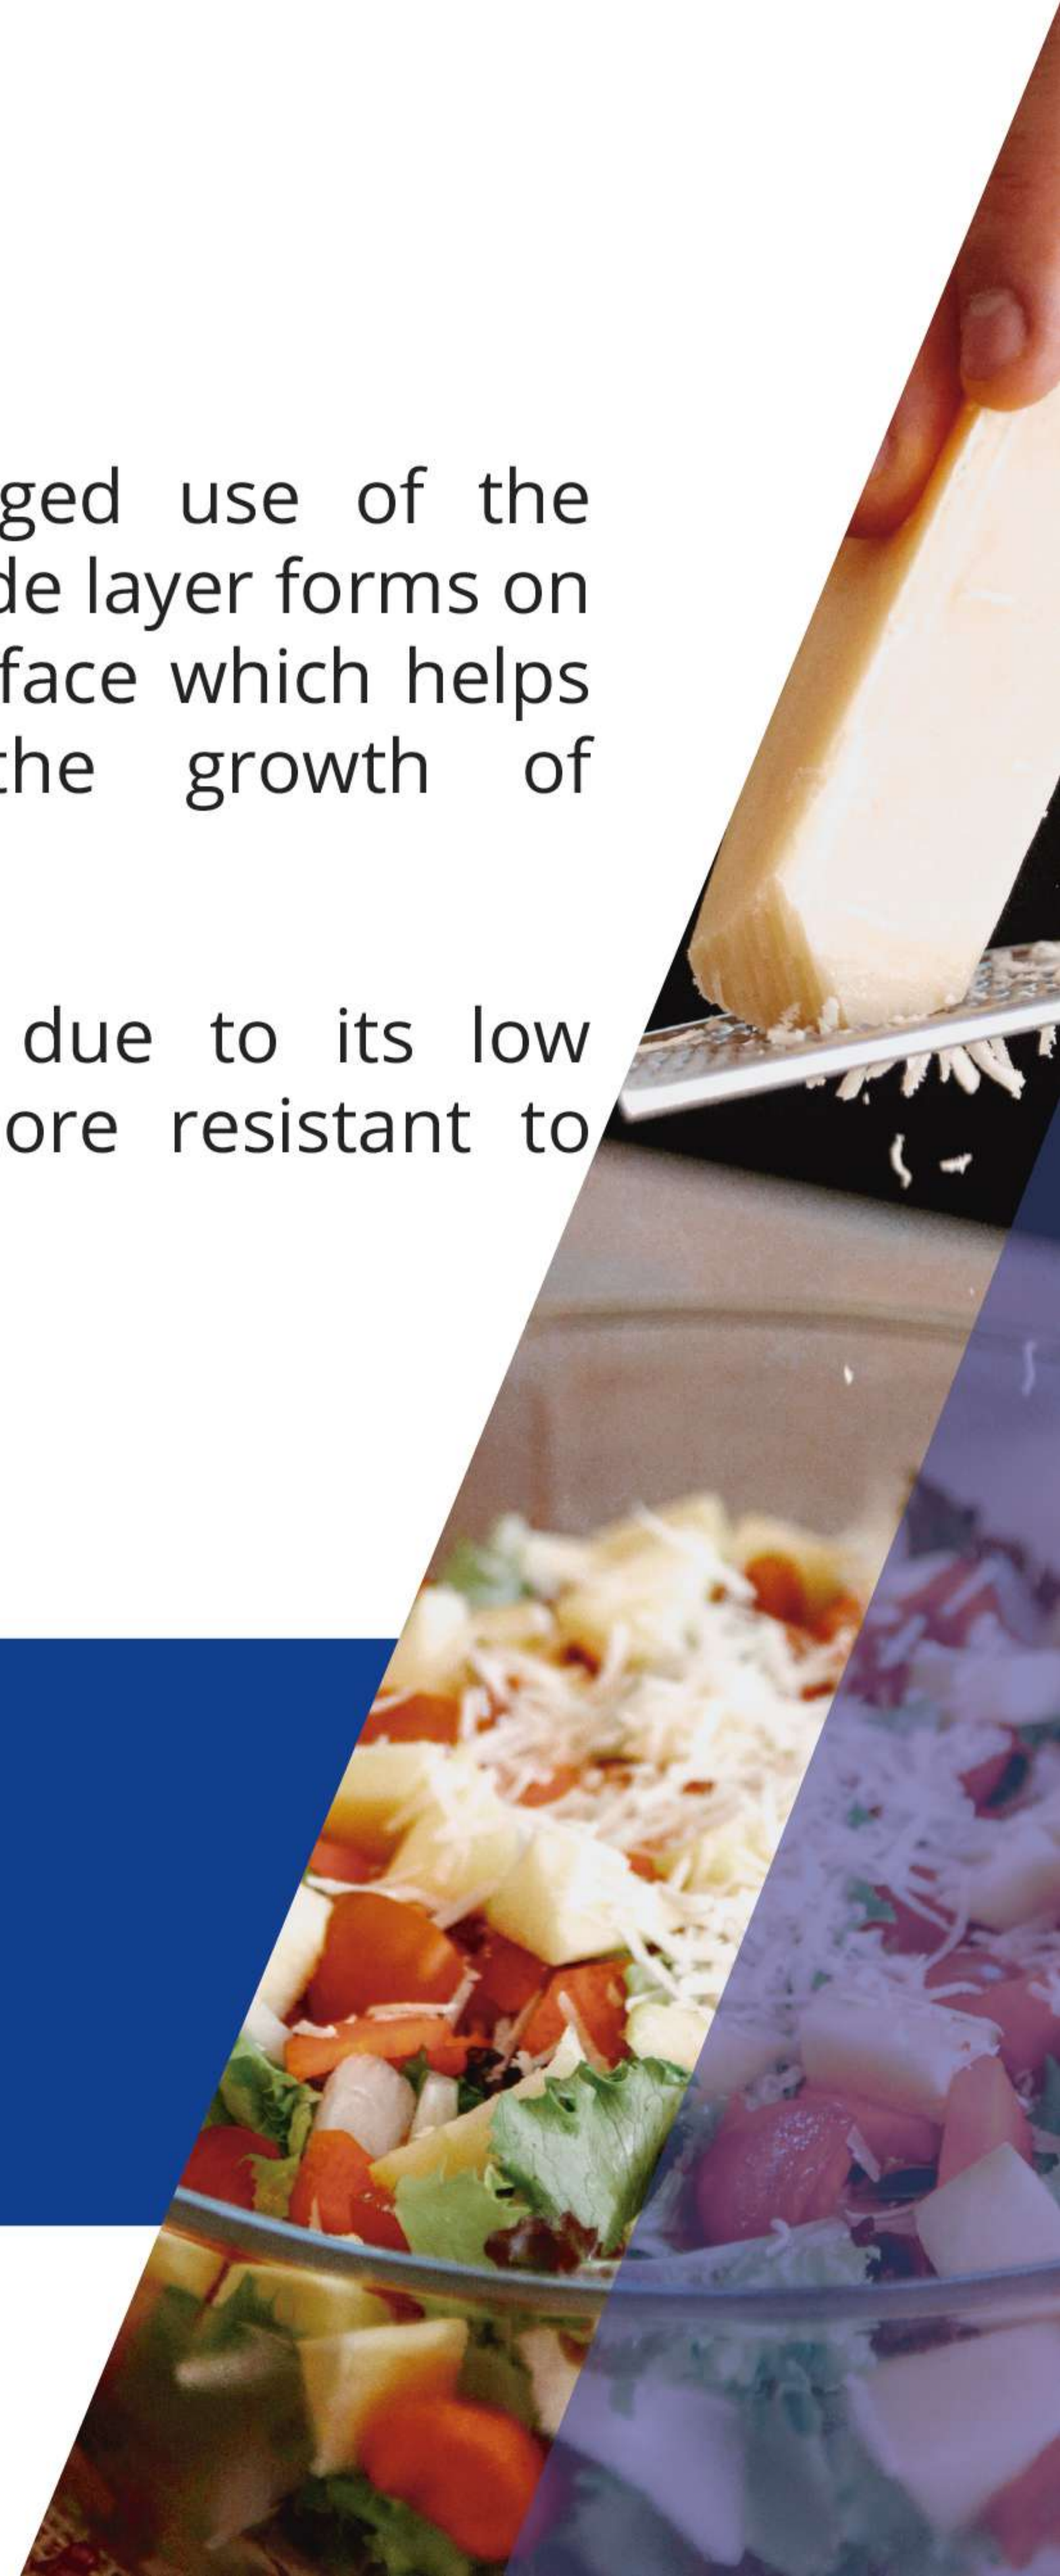

kidneys and brain; the titanium coating of our products is more resistant, promoting the health benefits of their use.

Why?

Titanium is a metal worldwide recognized as healthy. Neither motor nerves nor taste nerves are affected, so it can be ingested without any problem. It is widely used in the medical sector because it does not contain heavy metals that can lead to health problems.

After prolonged use of the products, an oxide layer forms on the titanium surface which helps to suppress the growth of bacteria.

In addition, due to its low density, it is more resistant to corrosion.

Durable

After decades of hard work, our own team has successfully developed the gold and titanium nanotechnology, the one that has conquered the main problem of scratching on the surface.

After 100,000 of continuous scratching tests, our cookware demonstrated good resistance against all types of scrapers, which prolongs the life of our products and it makes washing easier.

Titanium is highly resistant to acids and alkalis, being the corrosion rate in seawater only 0.00003 mm/year, much lower than stainless steel. In addition, the use of our titanium cookware is a way to avoid health problems caused by oxidation.

User-friendly

To help make cookware easier to use, the market offers mainly a thickness of cookware of 3 mm with weight above 2 kg.

We introduce the next step on energy efficiency, the titanium gold ceramic nanotechnology: we have reduced the thickness of the products by 1.5-3.0 mm, making a better thermal conductivity and allowing its weight to be less than 1 kg.

This fully patented design makes easier for everyone to use our cookware, so that anyone can fall in love with the art of cooking.

Extraordinary Cookware from birth

BLACK SERIES

Stainless steel outer layer

- Good permeability
- Strong and durable without deformation
- Compatible with all types of kitchen, from high cookers to home kitchens

Beech handle

- Ergonomic design
- Comfortable experience, anti-skid and anti-scald

Pure Titanium Screw

- Tightly junction to the pan
- Strong and durable

Saute pan

- Type: Pan TDCG004
- Size: 32 cm x 9,3 cm x 1,5 mm
- Net weight without lid: 1 kg

- Materials: Titanium / Aluminium / Steel GR1 / 1050/430
- Accessories: natural beech handle, no side ear, with lid
- Connection mode: fastened with Ti screw

Frying pan

- Type: Pan TDJG002
- Size: 26 cm x 5 cm x 2,8 mm
- Net weight: 1 kg

- Materials: Titanium / Aluminium / Steel GR1 / 1050/430
- Accessories: beech handle with original color, no side ear, no lid
- Connection mode: fastened with Ti screw

EXQUISITE SERIES

Made in three layers:

- Inner layer of pure titanium
 - Ensures the original taste of food
- Middle layer of pure aluminium
 - Conducts heat quickly and evenly
- Outer layer of stainless steel
 - Ensures pot strength
 - Applicable to a wide variety of heat sources: gas ceramic hob, gas, electro, halogen and induction

Properties:

- Antibacterial
- Retains the freshness
- Seals the taste

Soup pot

- Type: Pot TDTG002
- Size: diameter 22 cm x height 13 cm
- Net weight without lid: 1 kg

- Materials: Titanium / Aluminium / Steel
- Accessories: steel ears, with lid
- Function: simmering, boiling, rinsing, stewing

Saucepan

- Type: Pan TDNG002
- Size: diameter 16 cm x height 10 cm
- Net weight without lid: 0,6 kg

- Materials: Titanium / Aluminium / Steel
- Accessories: no steel ear, with lid
- Function: boiling
